WARNING:
 Radio wave sources may affect motorized scooters control.

Radio wave sources such as radio, TV, cell phone, TV, all kinds of radio (FM) transmitters, two-way radios and cell phones, can affect motorized scooters. Following the warnings listed below should reduce the chance of unintended brake release or unintended scooter movement which could result in serious injury.

- 1) Do not turn ON in-car personal communication devices such as cell phone and GPS devices while the motorized scooter is turned ON.
- 2) Be aware of nearby radio transmitters such as radio or TV stations, and try to avoid coming close to them.
- 3) In unintended movement or brake release occurrence, the motorized scooter OFF as soon as it is a stop.
- 4) Do not use the scooter accessories or components, or modifying the motorized scooter, may result in more susceptible to interference from radio wave sources.

(Note: There is no easy way to avoid the effect of the overall immunity of the motorized scooter.)

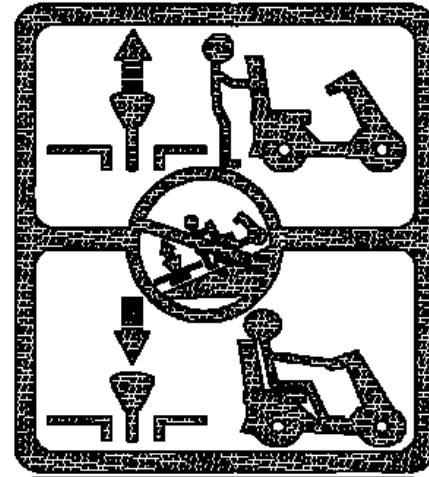

5) Report all in status of unintended movement or brake release to the motorized scooter manufacturer immediately, note whether there is a radio wave source nearby.

Important Information:

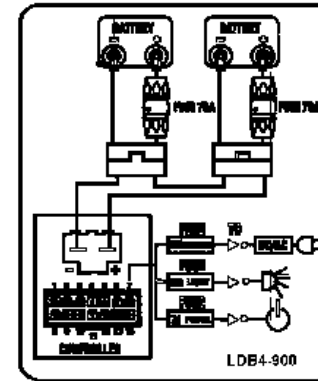

- 1) 20 volts per meter (V/m) is given by a class IIb and special immunity level against interference from radio wave sources (i.e. of more than 1994) (the higher the level, the greater the protection).
- 2) This product has an immunity level of 20 volts per meter (V/m).
