WARNING:

Radio wave sources may affect motorized scooter control.

Radio wave sources, such as radio stations, TV stations, cellular radio (4G) transmitters, two-way radios and cellular phones, can affect motorized scooters. Following the warnings listed below should reduce the chance of unintended brake release or motorized scooter movement which could result in serious injury.

- 1) Do not turn on hand-held personal communication devices, such as cellular handsets (CH) and dual cellular phones, while the motorized scooter is turned ON.
- 2) Do a safety check to familiarize yourself with the scooter or TV station, and try to avoid coming close to them.
- 3) If unintended movement or brake release occurs, turn the motorized scooter OFF as soon as it is safe.
- 4) Do not tamper with the scooter's accessories or components, or modify the motorized scooter, as it may become susceptible to interference from radio wave sources. (Note: there is no easy way to verify their effect on the control immunity of the motorized scooter.)
- 5) Report all incidents of unintended movement or brake release to the motorized scooter manufacturer, and note whether there is a radio wave source nearby. Important information:

- 1) 20 volts per meter (V/m) is generally a minimum and useful immunity level by test interference from radio wave sources (i.e. of up to 100V/m). (The higher the level, the greater the protection.)
- 2) This product has an immunity level of 20 volts per meter (V/m).

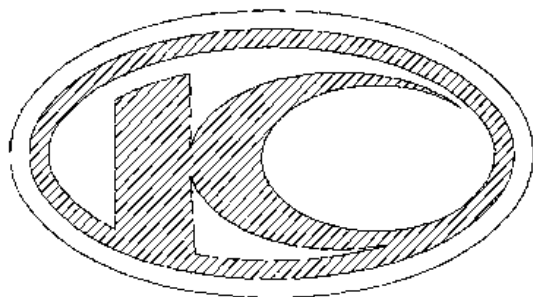

(4G2-002)
